

## California Water Plan Update 2009: Volume 2 - Resource Management Strategies

CWP Update 2009 Volume 2 describes 27+ resource management strategies that can help meet various Water Plan objectives. Regional managers can mix and match strategies into response packages, crafting them to provide multiple water and resource benefits, diversify their water portfolio, and become more regionally self-sufficient. Chapter	Title
	Table of Contents, Credits and Acknowledgements
1	Introduction
<b>Reduce Water Demand</b>	
2	Agricultural Water Use Efficiency
3	Urban Water Use Efficiency
<b>Improve Operational Efficiency and Transfers</b>	
4	Conveyance -- Delta
5	Conveyance -- Regional / local
6	System Reoperation
7	Water Transfers
<b>Increase Water Supply</b>	
8	Conjunctive Management & Groundwater
9	Desalination
10	Precipitation Enhancement
11	Recycled Municipal Water
12	Surface Storage -- CALFED
13	Surface Storage -- Regional / Local
<b>Improve Water Quality</b>	
14	Drinking Water Treatment and Distribution
15	Groundwater and Aquifer Remediation
16	Matching Water Quality to Use
17	Pollution Prevention
18	Salt and Salinity Management
19	Urban Runoff Management
<b>Practice Resources Stewardship</b>	
20	Agricultural Lands Stewardship
21	Economic Incentives
22	Ecosystem Restoration
23	Forest Management
24	Land Use Planning and Management
25	Recharge Areas Protection
26	Water-dependent Recreation
27	Watershed Management
<b>Improve Flood Management</b>	
28	Flood Risk Management
<b>Other</b>	
29	Other Strategies
