### Benefits and Cost Analysis

---

The below schedule shows the benefits and costs analysis for the three projects included in this proposal. The schedules show the start and end date for each project as well as milestones for each task that is detailed in *Attachment 3 – Work Plan*.

#### **City of Holtville Wastewater Treatment Plan Improvement Project**

Please find below, Table 12, which outlines the non-monetized benefits of the project. Included below is the analysis of those descriptions where the proposal will achieve those benefits. Please find attached Table 19, *BenCost Exhibit A*, which details the annual cost of the project, as well as Table 20, *BenCost Exhibit D*, which outlines the proposed benefits and costs of all three projects in this proposal.

The projects objectives will make the mandated improvements to the Wastewater Treatment Plant in a timely and cost effective manner, and will do so with minimal adverse impacts to the environmental and the disadvantaged community which it serves. The primary benefit of this project will be to diversify the regional water supply portfolio to ensure a long-term, verifiable, reliable and sustainable supply to meet current and future agricultural, municipal, commercial, industrial and environment demands. The project will do this in a way that will protect and enhance aquatic ecosystems and wildlife habitat and will focus on ecosystem improvement and environmental protection.

#### **Provide education or technology benefits**

The rehabilitated Wastewater Treatment Plant (WWTP) project will provide a higher level of treatment quality in terms of biological oxygen demand (BOD), suspended solids and nutrient removal (ammonia) using less energy. This technological benefit will allow the City to use 20 percent less energy even though it will include new components. The reduction in energy is possible as the new components, specifically, the new compressors will be more energy efficient.

#### **Help avoid, reduce or resolve various public water resources conflicts**

If funded, the proposed project would resolve conflicts between the Regional Water Quality Control Board (RWQCB) and the City of Holtville. The Holtville Wastewater WWTP is out of compliance with its RWQCB NPDES permit and is under a Cease and Desist Board Order. If the City does not comply with the Cease and Desist Order, there will be fines and penalties issued for lack of compliance with the Order. However, if improvements are made to the WWTP and the City is able to comply, the issue will be resolved and there will be no fines or penalties issued.

#### **Promote social health and safety**

## Attachment 8

### Benefits and Cost Analysis

---

The project will promote social health and safety by reducing exposure to water related hazards. By incorporating new equipment and rehabilitating the WWTP, the WWTP will be able to improve the treatment of wastewater, releasing into the environment improved effluent thereby reducing wastewater related hazards. Effluent would have a reduction of ammonia and e-coli

#### **Have other social benefits**

Holtville is considered is a disadvantaged community. The current sewer rates constitute 1.5% of the median household income (MHI) and sewer rates increases will be needed to service new debt incurred for the new improvements. The City of Holtville relies heavily on the agricultural industry and experiences many economic challenges. The Holtville community has a per capita income of \$20,749 in comparison to the State's \$29,634 (2007-2011 Census). Obtaining grant funding to make improvements to the wastewater treatment plant will reduce the amount that sewer rates will need to be increased for the community, thereby reducing the adverse economic effects to a disadvantaged community.

#### **Benefit wildlife or habitat in ways that were not quantified in Attachment 7**

Effluent from the Wastewater Treatment Plant is released into the Pear Drain, a tributary to the Alamo River, which is a tributary to the Salton Sea. The Salton Sea is located along one of the most important flyways in North America, providing critical habitat for more than 400 species of resident and migrating birds and home to a variety of fish. The improvement of effluent from the WWTP will benefit wildlife. Particularly, the proposed project will positively impact species of special concern such as the Fathead Minnow and the Desert Pupfish, an endangered species for which a Recovery Plan was completed in 1993. Improving the water quality of water traveling into the Salton Sea will positively impact fish, thereby positively impacting the birds on land which eat the fish.

#### **Improve water quality in ways that were not quantified in Attachment 7**

The completion of the project will improve water quality for impaired bodies of water such as the Pear Drain, Alamo River and the Salton Sea, all of which are impaired bodies of water per Section 303(d) of the Clean Water Act. The project would lead to the reduction of contaminants such as ammonia, nickel and e-coli.

#### **Reduce net emission in ways that were not quantified in Attachment 7**

The improvements to the WWTP include new energy efficient machinery and electrical updates, reducing the consumption of electricity by 20%. Reducing energy usage in turn will lead to a reduction of greenhouse gas emissions as the combustion of fuels to generate electricity is responsible for emitting greenhouse gas emissions. The project will also reduce the amounts of harmful chemicals such as ammonia, which is toxic to aquatic life nickel and e-coli into the water.

Benefits and Cost Analysis

**Provide a long term solution in place of a short-term one**

The proposed project will provide a long term solution to the City’s wastewater treatment problems. It is anticipated that the new wastewater components will allow the City to comply with its NPDES permit, specifically, the stringent ammonia requirements.

**Promote energy savings or replace fossil fuel based energy sources with renewable energy and resources**

The rehabilitated WWTP includes the replacement of existing compressors with new compressors which consume less energy. It is estimated that there will be a reduction of 20% of energy with the new more energy efficient compressors. The reduction in consumption of electricity also reduces the amount of fossil fuels used for the operation of the WWTP. Additionally, the proposed project includes the construction of a new laboratory building and will replace an old laboratory building. The new building will include more energy efficient components such as new insulation, a new air conditioner, and lighting fixtures that will also lead to a reduction in the consumption of electricity. Lastly, the project will lead to the reuse of materials. The dry sludge waste from the WWTP is hauled-off and used to fertilize agricultural land to grow crops used as feed for animals thereby recycling waste materials.

**Job Creation to Strengthen Local Economy**

Holtville is within Imperial County in southeastern California. Imperial County’s unemployment rate in January 2013 was 25.8% and consistently has the highest unemployment rate in the nation. It is anticipated that the proposed project will create 40-50 construction jobs over a twelve (12) month period, and improving the local economy.

annual cost of the project, as well as Table 20, *BenCost Exhibit D* which outlines the proposed benefits and costs of all three projects in this proposal.

#### **Help avoid, reduce or resolve various public water resources conflicts**

This project will support the Imperial IRWM by providing a reliable water source to the region by promoting an interconnected system that provides system redundancy, promotes a community benefit and improves the overall water supply for the region. The key benefit of this project is the water quality reliability that will be provided once the construction linkage is complete. This project will provide a long term water supply solution for the community and will help to avoid and reduce public water resource conflicts.

#### **Promote social health and safety**

Currently, the only alternative being used in the event of any emergency is to provide water via water trucks or temporary above ground pipes to connect both systems. By streamlining the benefiting agencies seek to improve the reliability of the existing water distribution systems, since the Interconnect would reduce the likelihood of catastrophic supply outages and reduce supply uncertainty. This project will improve the overall social health of the community by increasing the water supply and by taking advantage of the geographical proximity that these communities have. Water systems in the City of Imperial, City of El Centro and the community of Heber are all independent systems providing potable and fire-fighting water in their respective areas. Water tanks in each individual system can provide limited water supply during an emergency but that might not be enough supply and pressure to sustain fire-fighting efforts during major catastrophes such as earthquake or system failure. The interconnect project would provide redundancy in all three systems.

#### **Have other social benefits**

The City of El Centro and the Heber Public Utility District are disadvantaged communities with a Median Household Income that is less than 80 percent of the Statewide annual median household income as identified by the California Department of Water Resources Mapping Tool. The MHI for the City of El Centro is \$38,481, and the MHI for the Heber Public Utility District is \$37,472 (2006-2010 America Community Survey). This project will directly increase the participation of a small, disadvantaged community in the IRWM process. In addition, this project will develop a multi-benefit, multi-jurisdictional project that considers the needs of two disadvantaged communities. Both cities rely on a single source of water system and would be adversely affected in the event of a major catastrophe.

**Provide a long term solution in place of a short-term one.**

The proposed project will provide a long term solution to the City's connection issues.

### **Stormwater Drainage Improvements to the Township of Seeley**

Please find below, Table 12, which outlines the non-monetized benefits of the project. Included below is the analysis of those descriptions where the proposal will achieve those benefits. Please find attached Table 19, *BenCost Exhibit C*, which details the annual cost of the project, as well as Table 20, *BenCost Exhibit D*, which outlines the proposed benefits and costs of all three projects in this proposal. In addition, because this project will have flood reduction benefits, please find Table 18, *BenCost Exhibit E*, which details the expected benefit of this project over the projects life cycle. Please find a thorough cost benefit analysis for this project attached as *BenCost Exhibit F*.

The City of Seeley is seeking to provide the City with much needed drainage infrastructure. This project will convey rainwater away from the community and will in turn help to prevent the flooding of streets and provide a better and safer public access for vehicles and pedestrians in the community.

#### **Provide education or technology benefits**

The project will provide educational benefit, in that children will not stay home from school on rainy days. Residents who do not own cars will be able to walk safely to destinations around the community, on rainy days.

#### **Provide social recreation or access benefits**

This project promotes social health and safety as it will reduce vector control issues and the danger to pedestrians walking through flooded streets.

#### **Promote social health and safety**

This project will have additional social benefits as Seeley is a disadvantaged community and has little or no drainage infrastructure. The project will be beneficial for all citizens

Attachment 8

Benefits and Cost Analysis

of this community. In addition, this project will reduce problems with mosquitoes and the diseases they carry.

**Improve water quality in ways that were not quantified in Attachment 7**

By draining storm water through a passive storm/nuisance water treatment system, which will cleanse water before it drains into the New River, this project will provide additional water quality benefits. The water treatment system that is a part of this project will mitigate the effect of the additional storm water draining into the New River.

**Provide a long-term solution in place of a short-term one**

Since the project has a useful life is 50 years it is providing a long term solution in place of the current short term, inefficient, solution of pumping water each time it rains.

Comments: Project operational in January 2015. Maintenance will include periodic visual inspections of manholes, curb, gutter and the passive nuisance/storm water treatment system, to be sure they are free of debris, at an annual cost of \$2,500. Every five years a video inspection will be performed to evaluate the structural integrity of the drainage system, at a cost of \$7,500. The passive nuisance/storm water treatment system will last approximately 25 years, with a replacement cost of \$100,000.

(a)	(b)	(c)	(d)	(e)	(f) = (d) + (e)	(g)	(h)
<b>Wastewater Treatment Plant Improvement Project</b>	City of Holtville	\$16,088,125.00	\$0.00	\$0.00	\$0.00	N/A	The projects objectives will make the mandated improvements to the Wastewater Treatment Plant in a timely and cost effective manner, and will do so with minimal adverse impacts to the environmental and the disadvantaged community which it serves. The primary benefit of this project will be to diversify the regional water supply portfolio to ensure a long-term, verifiable, reliable and sustainable supply to meet current and future agricultural, municipal, commercial, industrial and environment demands. The project will do this in a way that will protect and enhance aquatic ecosystems and wildlife habitat and will focus on ecosystem improvement and environmental protection.
<b>Interconnection Project between City of El Centro, City of Imperial and the Heber Utility District</b>	City of El Centro	\$21,123,550.93	\$0.00	\$0.00	\$0.00	N/A	This project will provide a long term water supply solution for the community and will help to avoid and reduce public water resource conflicts. Currently, the only alternative being used in the event of any emergency is to provide water via water trucks or temporary above ground pipes to connect both systems. By streamlining the benefiting agencies seek to improve the reliability of the existing water distribution systems, since the Interconnect would reduce the likelihood of catastrophic supply outages and reduce supply uncertainty. This project will improve the overall social health of the community by increasing the water supply and by taking advantage of the geographical proximity that these communities have. Water systems in the City of Imperial, City of El Centro and the community of Heber are all independent systems providing potable and fire-fighting water in their respective areas. Water tanks in each individual system can provide limited water supply during an emergency but the might not be enough
<b>Drainage Improvements in the Township of Seeley County of Imperial Project No. 5363</b>	Township of Seeley	\$1,984,434.00	\$0.00	\$3,774,031.44	\$3,774,031.44	N/A	The project will provide educational benefit, in that children will not stay home from school on rainy days. Residents who do not own cars will be able to walk safely to destinations around the community, on rainy days. In addition this project promotes social health and safety as it will reduce vector control issues and the danger to pedestrians walking through flooded streets. This project will have additional social benefits as Seeley is a disadvantaged community and has little or no drainage infrastructure. The project will be beneficial for all citizens of this community. By draining storm water through a passive storm/nuisance water treatment system, which will cleanse water before it drains into the New River, this project will provide additional water quality benefits. Finally, since the project has a useful life is 50 years it is providing a long term solution in place of the current short term, inefficient, solution of pumping water each time it rains.

MAINTENANCE PLAN

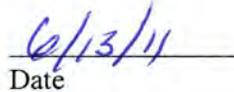

DR-1911 HAZARD MITIGATION GRANT PROGRAM  
COUNTY OF IMPERIAL  
Drainage Improvements for the Township of Seeley  
County Project Number 5363

The County of Imperial has established the following plan for the maintenance of drainage improvements in the Township of Seeley. The project will consist of drainage improvements that will lessen the potential for frequent flooding in Seeley that causes health and safety issues, as well as financial loss to the community. If the drainage improvements are properly maintained, the project useful life is 50 years. Imperial County Public Works Roads staff will be responsible for the maintenance.

Maintenance for this improvement will require periodic visual inspection of the manholes, gutter and curb inlets and other appurtenances to be sure they are clear of debris. It is estimated that the annual cost would be approximately \$2,500. Every five years a video inspection will be performed to evaluate the structural integrity of the drainage system. The video inspection would be approximately \$7,500, which spread over five years would be \$1,500 per year. Therefore, the total annual maintenance cost will be approximately \$4,000 per year.

## OFFICE OF EMERGENCY SERVICES

2800 MEADOWVIEW ROAD  
SACRAMENTO, CALIFORNIA 95832

(916) 262-1765

MAR 14 1994

S. Harry Orfanos  
Director of Public Works  
Imperial Co. Public Works Dept.  
155 South 11th Street  
El Centro, CA 92251

Dear Mr. Orfanos:

SUBJECT: Supplement No. 04  
Natural Disaster Assistance Act  
State No. OES 93-01-357  
Imperial Co. Public Works Dept.

RECEIVED  
MAR 18 1994  
PUBLIC WORKS

The attached Supplement No. 04 has been approved by the Office of Emergency Services for \$5,652.00. The total amount now approved as the State share for this application is \$2,957,827.00.

Please review the attached project application proposal and if it is acceptable, complete the attached Exhibit "D" and return a signed original to this office within ten (10) days from the date on this letter. If you do not agree with the approved project proposal, please advise us immediately, in writing, citing the reason for the exception. Indirect costs will be adjusted at the time of final inspection. Funds cannot be allocated or paid for this application until we receive the signed acceptance.

To request an advance of funds, please complete the attached Request for an Advance of Funds (NDAA 3). Under procedures developed for this disaster, you may request the full 90% advance as allowed under the Act. Fund advances must be deposited in a special fund or account. Under no circumstance should any expenditure be made from this fund for costs not approved as eligible in your state application.

The attached supplement, including the Project Application and supporting documents, are for your information and records and should be retained by you. Please only return the Exhibit "D" and/or other forms as requested to process your application.

If any further information or assistance is needed, please call Janice Lane at OES Headquarters (916)262-1765.

Sincerely,

A handwritten signature in dark ink, appearing to read "Richard Ray".

RICHARD RAY  
Acting Chief  
Disaster Assistance Division

Codie,

The cost is annual so it works out to be about \$33.72 per day.

Thank you so much, Mrs. Denton. This is the cost per child, per day – or the total cost for 2010-2011?

Codie,

Here are some figures for you:

For 2010-2011, the cost for ADA is \$6,069

Our budget is: \$2,531,165.

Thanks,

Cathy Denton

**Importance:** High

Good morning Ms. Larios,

I have been working with Mrs. Denton and Teresa Morales for information I need in order to apply for a grant from FEMA's Hazard Mitigation Grant Program. If approved, the project will improve the drainage in Seeley to protect against damages and hazards due to flooding. In order to apply for the grant, I need to have a benefit cost ratio of greater than 1.0, so I am scrambling to find costs and damages from previous floods. If you can assist me, I am asking for answers to the following questions:

What is the cost per student, per day, when students do not attend school?

What is the amount of Seeley School's annual total budget?

Do you have documentation of expenditures, such as costs to purchase palettes; costs of staff to place the palettes; or any other costs you can think of that the School incurs due to rain and flooding?

I have a fast-approaching deadline, so it will be helpful to have the information by the end of this week. I know your time is extremely valuable. Your assistance will be of great benefit to the students and residents of Seeley. Should you have any questions or need further information, please do not hesitate to contact me.

Thank you very much,

Codie Rowin

**MEMORANDUM**

**TO:** William S. Brunet, Public Works Director  
**FROM:** Jeff Lamoure, Deputy Director  
**SUBJECT:** Mosquito Abatement Response in the Townsite of Seeley, CA

In response to your letter dated April 12, 2011, the Public Health Department reviewed its Vector Control surveillance and response records from 2003 through 2011 for mosquito abatement activities in the townsite of Seeley, CA. Although our records do not specifically identify flooding or rainfall events, any mosquito abatement activities associated with the townsite of Seeley would be the result of standing/ponding water.

I have separated the data into the two categories; Monitored Sites and Complaints. Below is a summary of the total hours and costs incurred for each category:

Source	Hours	Cost
Complaints	1,215 min = 20.25 hrs	20.25 X \$63.23 (FBR) = \$1,280.40
Monitored Sites	871 min = 14.51 hrs	14.51 X \$63.23 (FBR) = \$917.46

I have also attached detailed spreadsheets for both categories. Unfortunately the time calculations from 2003 through 2008 for the Monitored Sites are missing as a result of an error in the data conversion when the Division upgraded to a new data management system.

Please let me know if you have any questions.
