

# Imperial IRWMP Table of Contents

---

## **1 Introduction (20 pgs)**

---

- 1.1 Purpose of the IRWMP
- 1.2 Convening Imperial Water Forum
- 1.3 Imperial Region Overview
- 1.4 Background
- 1.5 Issues and Conflicts
- 1.6 Issues and Challenges Identified by the Water Forum and Stakeholders
- 1.7 Goal and Objectives
- 1.8 Content and Organization
- 1.9 Meeting the CDWR Standards Proposition 84 Standards

## **2 Imperial Region Planning Environment (11 pgs)**

---

- 2.1 Basis for Imperial Region Boundary
- 2.2 Planning Horizon
- 2.3 Planning Process
- 2.4 Integration Approaches
- 2.5 Relationship to other Hydrologic Regions and IRWM Regions
- 2.6 Planning Baseline and Existing Plans

## **3 Governance, Stakeholder Involvement and Outreach (14 pgs)**

---

- 3.1 Jurisdictional Authorities
- 3.2 Water Forum and Regional Water Management Group Charter
- 3.3 Stakeholder Involvement, Outreach and Public Affairs

## **4 Region Description and Baseline Conditions (58 pgs)**

---

- 4.1 Engineered Environment
- 4.2 Economy and Community
- 4.3 Physical Environment

## **5 Supply–Demand and Water Budget (50 pgs)**

---

- 5.1 Water Supplies
- 5.2 Reliability of IID’s Colorado River Supply
- 5.3 Vulnerability to Climate Change
- 5.4 Current and Future Water Demands
- 5.5 Overview of The Imperial Region Water Supply Portfolio s
- 5.6 Water Budget
- 5.7 Groundwater Management Plan

---

**6 Summary of the Review of Resource Management Strategies (17 pgs)**

---

- 6.1 RMS Standards
- 6.2 RMS Review Process
- 6.3 Rational for Eliminating a CDWR Strategy from Further Consideration.

---

**7 Increase Water Supply (80 pgs)**

---

- 7.1 Groundwater Development, Storage, Banking and Conjunctive Use
- 7.2 Recycled Municipal Water
- 7.3 Desalination
- 7.5 Matching Quality to Use
- 7.6 Conveyance- Local/~~Regional~~
- 7.7 Surface Storage- Regional/Local/CALFED

---

**8 Reduce Water Demand (47 pgs)**

---

- 8.1 Agricultural Water Use Efficiency and Conservation
- 8.2 Geothermal/Renewable Energy Water Use Efficiency
- 8.3 Urban Water Use Efficiency

---

**9 Improve Flood Management (10 pgs)**

---

- 9.1 Findings and Recommendations
- 9.2 Current Circumstances
- 9.3 Opportunities
- 9.4 Constraints
- 9.5 Relation to other Water Management Strategies
- 9.6 Potential to Support Mitigation or Adaption to Climate Change

---

**10 Improve Water Quality (approx 32 pgs)**

---

- 10.1 Drinking Water Treatment and Distribution

---

**11 Practice Resources Stewardship & Other Strategies (approx 24 pgs)**

---

- 11.1 Ecosystem Restoration and Management – Mitigation Banking
- 11.2 Economic Incentives (Loans, Grants, Water Pricing)
- 11.3 Land Use Planning and Water Management

**12 Review of Project, Program and Funding Alternatives (approx. 32 pgs)**

---

12.1 Projects

12.2 Program/Policy Alternatives

(7.4) Source Water Substitution, In- Lieu Use

(11.4) In-Valley Exchange

12.3 Funding Alternatives

**13 Implementation Plan (approx 36 pgs)**

---

13.1 Governance and Management

(5.7) Groundwater Management Plan

13.2 Environmental Review

13.3 Funding/Financing

13.4 Next Steps

**14 References**
